Medical Necessity Guidelines:

Physicians must only order tests that they have determined are medically necessary for the diagnosis and treatment of a patient. MDL offers individual tests, as well as a limited number of customized panels. MDL provides practitioners with the flexibility to choose appropriate individual tests for each specimen to assure that the convenience of ordering panels does not impede them from ordering tests/panels that are medically necessary. All tests listed in panels may be ordered individually using this test requisition form. If you choose to order a panel, please make certain that each and every test is medically necessary. If you check off a panel as your choice, MDL understands that the physician has determined that all of the component tests are medically necessary, and will perform, report and bill for all such component tests.

** This test can only be performed when the test in parenthesis is positive. All tests performed will be billed.
Test by Real-Time PCR unless otherwise specified.

OneSwab® & UroSwab® are registered in the USPTO.

Specimen Collection Platform	TAT*	Stability	Test Additions*	Specimen Collection
OneSwab® 	24 - 72 hours	7 days	30 days to add tests	<ol style="list-style-type: none"> Collect specimen with the sterile swab provided. Insert swab into the transport media, break off swab and tightly re-secure the cap on the transport media vial.
UroSwab® 	24 - 72 hours	4 days	14 days to add tests	<ol style="list-style-type: none"> Have patient collect a urine specimen in a collection cup. Dip the sponge swab into collection cup to absorb the urine. Tightly re-secure the cap on the vial.
ThinPrep®	Pap Testing	7 - 10 days	6 weeks to add Pap testing	<ol style="list-style-type: none"> Obtain an adequate sample: <ul style="list-style-type: none"> Endocervical brush - Insert brush into the cervix until only the bottom-most fibers are exposed. Slowly rotate 1/4 or 1/2 turn in one direction. DO NOT OVER-ROTATE. Broom - Insert the central bristles of the broom into the endocervical canal deep enough to allow the shorter bristles to fully contact the ectocervix. Push gently, and rotate the broom in a clockwise direction five times. Spatula - place contoured end against exocervix and rotate 360 degrees around the entire surface. Rinse in the PreservCyt® solution by swirling vigorously 10 times. Tighten the cap so that the torque line on the cap passes the torque line on the vial.

Biopsies 	3 - 5 days	7 days	30 days to add tests	<ul style="list-style-type: none"> Collect specimen and insert into the formalin vial. The following times must be documented on the test requisition form: <ul style="list-style-type: none"> Time of specimen removal from patient Time when specimen was placed into formalin

* Up to 72 hours with reflex/antibiotic resistance testing

* Pending QC review for sufficient specimen volume

Specimen Packaging:

- Label every vial with a minimum of 2 patient identifiers including the patient's name and date of birth. Be sure the name on the vial is written exactly the same way as on the test requisition form.
- Place the vial into the Styrofoam/Cardboard container. You can fit up to 3 vials in one container.
- Place the Styrofoam/Cardboard container into the central pocket of a biohazard bag containing absorbent material.
- Place a completed test requisition form for each vial in the front pocket of the biohazard bag.
- Place the biohazard bag into the prepaid Lab pack Envelope that has a preaddressed airbill attached. One envelope will accommodate 6-7 containers. Package as many containers in one Labpack as possible.
- Be sure to seal the Lab pack by removing the plastic from the top of the adhesive.

Specimen Pick-up:
