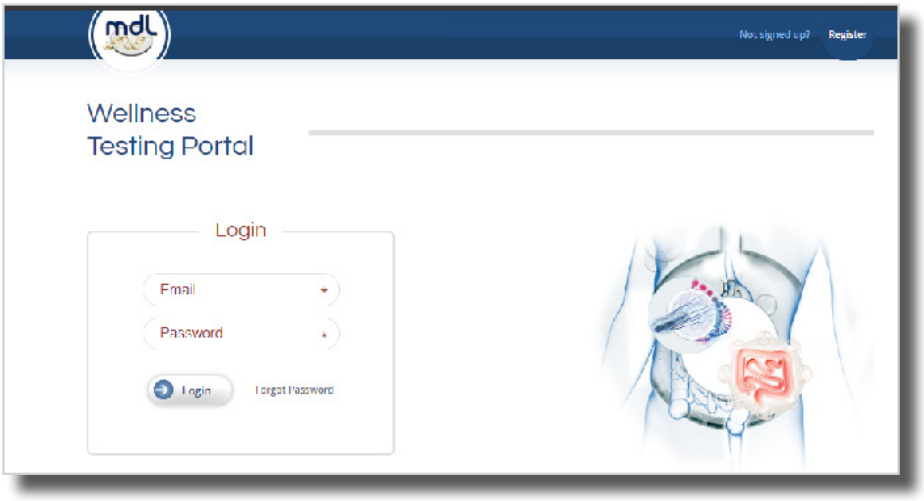
$129 2101 ☐ **Gut Microbiome Profile by DNA Sequencing** Analysis of bacterial composition utilizing the DNA sequence of 16s rRNA regions

Kit ID#: _____ ***Be sure to write the Kit ID# on the specimen vial label***

To regster for an account in MDL's Wellness Testing Portal patients must scan the code or visit app.mdlab.com

1. Complete the health questionnaire
2. Submit payment



Medical Necessity Guidelines:

Physicians must only order tests that they have determined are medically necessary for the diagnosis and treatment of a patient. MDL offers individual tests, as well as a limited number of customized panels. MDL provides practitioners with the flexibility to choose appropriate individual tests for each specimen to assure that the convenience of ordering panels does not impede them from ordering tests/panels that are medically necessary. All tests listed in panels may be ordered individually using this test requisition form. If you choose to order a panel, please make certain that each and every test is medically necessary. If you check off a panel as your choice, MDL understands that the physician has determined that all of the component tests are medically necessary, and will perform, report and bill for all such component tests.

Specimen Collection Platform		TAT*	Stability	Test Additions¥	
Stool		14-21 days	10 days	N/A	1. Unscrew the collection tube cap and use the attached spoon to scoop one spoonful of feces from the stool. DO NOT disconnect the spoon from the cap. DO NOT drink, touch, or remove the liquid from the tube. 2. Place the spoon into the tube and securely tighten the cap. 3. Mix the contents thoroughly by inverting 10 times. Some fecal material may not completely mix into the solution. This is acceptable as long as the material is submerged beneath the liquid.

¥ Pending QC review for sufficient specimen volume

Specimen Packaging:

1. Label every vial with a minimum of 2 patient identifiers including the patient's name and date of birth. Be sure the name on the vial is written exactly the same way as on the test requisition form.
2. Place the vial into the Styrofoam/Cardboard container. You can fit up to 3 vials in one container.
3. Place the Styrofoam/Cardboard container into the central pocket of a biohazard bag containing absorbent material.
4. Place a completed test requisition form for each vial in the front pocket of the biohazard bag.
5. Place the biohazard bag into the prepaid Lab pack Envelope that has a preaddressed airbill attached. One envelope will accommodate 6-7 containers. Package as many containers in one Labpack as possible.
6. Be sure to seal the Lab pack by removing the plastic from the top of the adhesive

Specimen Pick-up:

- If you have a specimen pick-up for a local courier in the NJ, PA, DE, D.C., MD, VA, KS, MO or Phoenix, AZ area, please call (877) 205-0005 no later than 2 hours prior to the closing of your facility.
- If you have a specimen pick-up, please call your sales representative or MDL customer service at 877.269.0090 no later than 2 hours prior to the closing of your facility.

Helpful Hints Checklist

Please review these helpful hints to reduce specimen discrepancies and enhance turnaround time.
